Summary

Senior Data Analyst and BI Developer with 5+ years of experience designing enterprise analytics solutions, automated data pipelines, and scalable reporting platforms using Power BI, SQL, Azure, Databricks, and Microsoft Fabric. Experienced in developing executive and operational dashboards, building reusable data transformation layers, implementing dynamic security, migrating reporting ecosystems to modern cloud platforms, and applying Python and Machine Learning techniques for analytical use cases. Proven experience leading BI delivery, translating business requirements into analytical solutions, and supporting global stakeholders across sales, finance, operations, and retail analytics.

Skills

BI & Analytics: Power BI, DAX, Power Query, Paginated Reports, Tableau, Data Modeling, RLS

Data Engineering & Cloud: Azure Data Factory, Databricks, Microsoft Fabric, Azure Synapse, Dataflows, ETL/ELT

Programming & Databases: SQL, Python, Pandas, NumPy, SQL Server, Azure SQL, PostgreSQL, MySQL, Redshift, Cosmos DB

Azure & Monitoring: Azure Application Insights, Logic Apps, KQL, SharePoint, Azure DevOps

Machine Learning: Fundamentals of Data Preprocessing, EDA, Regression, Classification, and Model Evaluation

Experience

Technology Analyst – Data Analytics & Business Intelligence

Jan 2025 – Present

Infosys — Bengaluru, India

Power BI, Databricks, Synapse, SQL

- **Developed 10+ region-based Power BI sales reports** using advanced DAX and time-intelligence calculations, enabling business teams to analyze revenue, sales trends, and geographical performance across multiple markets.
- **Engineered 25+ reusable Power BI Dataflows** to ingest, transform, combine, and standardize data from multiple enterprise sources into centralized landing and curated layers, reducing repeated source-level processing across BI solutions.
- **Authored 5+ Business Requirements Documents (BRDs)** by collaborating with business stakeholders to translate reporting requirements, KPIs, business rules, and analytical needs into implementable BI solutions.
- **Led a team of 3 analysts and delivered 15+ end-to-end BI projects**, coordinating requirement analysis, development, testing, deployment, and production support while improving deployment success rates from 75% to 95%.
- **Migrated 3+ large-scale reporting solutions** from Azure Synapse, Amazon Redshift, SharePoint, and Excel-based sources to Databricks, consolidating fragmented data sources into unified analytical models.
- **Created and maintained 4 structured documentation artifacts per BI solution** across 20+ Power BI reports, including technical documents, instruction guides, operational manuals, and user manuals, reducing support dependency by approximately 35%.
- **Performed end-to-end User Acceptance Testing (UAT)** across enterprise BI reports, validating business rules, KPI calculations, source-to-report reconciliation, and data completeness prior to production deployment.

System Engineer – Data Analytics & Business Intelligence

Jul 2021 – Dec 2024

Tata Consultancy Services — Bengaluru, India

Power BI, Azure, ADF, SQL, KQL

- **Engineered 15+ Azure Data Factory pipelines** to migrate and synchronize enterprise data from on-premises SQL Server to Azure SQL Database, enabling automated and reliable cloud-based data ingestion.
- **Automated ADF pipeline failure monitoring using Azure Logic Apps**, configuring email-based alerts to improve visibility into integration failures and accelerate operational issue resolution.
- **Executed end-to-end SQL database refreshes across development and lower environments** by restoring production database backups, providing production-representative datasets for development, troubleshooting, testing, and validation.
- **Analyzed application telemetry across an 18-API order-processing workflow** using Azure Application Insights and Kusto Query Language (KQL), tracing exceptions, API failures, transaction logs, and dependencies to identify failure points.
- **Developed Power BI operational dashboards covering an 18-API order lifecycle**, providing visibility into order volumes, successful order creation, failed transactions, processing status, and API-level exceptions.
- **Designed and delivered 15+ Power BI dashboards and operational reports** for a global fashion retail business, consolidating sales, order, product, and operational KPIs across multiple regions, planning markets, and countries.
- **Built enterprise sales analytics across Region → Planning Market → Country → Department → Product/SKU hierarchies**, developing 40+ DAX measures for revenue, order volume, units sold, average order value, gross margin, YoY growth, and period-over-period performance.
- **Developed merchandise analytics across 1,000+ product variants**, enabling analysis by department, category, product, color, size, and SKU to identify top- and bottom-performing products across geographical markets.
- **Implemented dynamic Row-Level Security (RLS) for 100+ business users**, mapping user identities to assigned regions, planning markets, and countries while maintaining centralized access control within Power BI semantic models.

Projects

Uber Ride Analytics Dashboard

Power BI — SQL — DAX

- Developed an interactive dashboard to analyze bookings, revenue, cancellations, ride trends, and operational KPIs using dynamic filters and DAX measures.

Financial Performance Dashboard

Power BI — SQL — DAX

- Built an executive finance dashboard covering revenue, expenses, profitability, EBITDA, budget vs. actuals, and period-over-period performance.

Data Analyst Portfolio Website

Web Development — UI/UX — GitHub

- Designed and developed a responsive portfolio website showcasing professional experience, technical skills, analytics projects, and certifications.

Education

Bachelor of Technology (B.Tech)

Graduated: 2021

Anil Neerukonda Institute of Technology & Sciences

Certifications

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** – Microsoft.
- **Microsoft Certified: Azure Developer Associate (AZ-204)** – Microsoft.
